## **SUBJECT: RECOMMENDATION LETTER FOR LAGOM ENGINEERING**

---

This letter serves as an official endorsement of Lagom Engineering, following the highly successful completion of our recent mechanical, electrical, and plumbing infrastructure frameworks.

*"Lagom Engineering delivered exceptional technical oversight during our plant upgrade cycle. Their industry-leading precision in deploying low-voltage switchgear arrays was absolutely flawless."*

Throughout the timeline of the project, their engineering consult showed an outstanding commitment to scheduling protocols, hardware alignment, and regulatory safety benchmarks. The standard of planning and operational excellence they introduced remains highly visible within our utility assets.

We confidently endorse their operational teams for any large-scale electrical distribution arrays or complex technical upgrades.
